Themes/Feel

Index

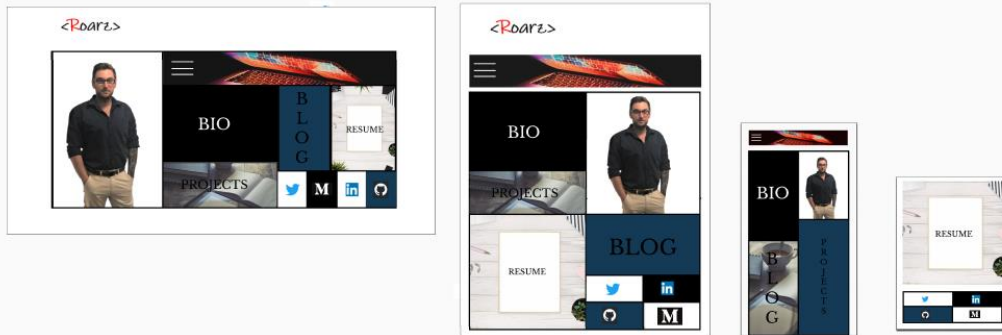

Bio, Projects & Blog

Designed Mobile first With Grid for responsive layouts!

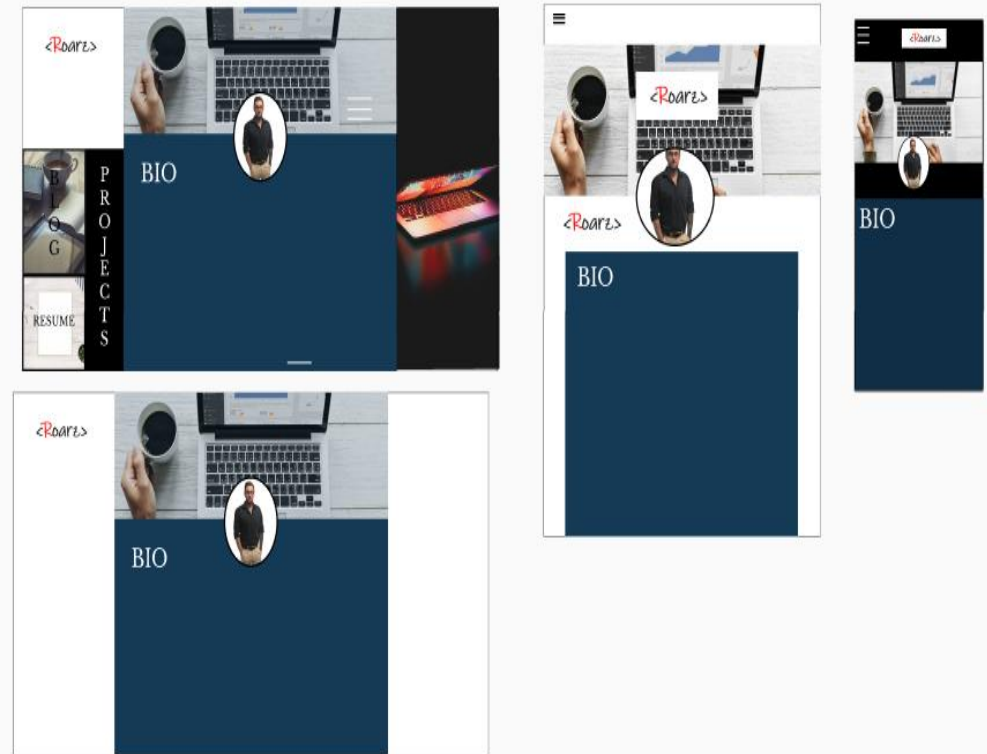

Index

Desktop, Tablet & Mobile Layouts for the Index Page

Bio, Projects & Blog

These are the desktop, tablet and mobile layouts for the Bio, Projects & Blog pages. The Projects and Blog pages will be the same with a few minor differences. The links on the left on the desktop will vary to make the bio page available and not the current page.

Index is the Home page & will have graphic links to all of the pages with animations to catch the eye.

Index

Blog

Links externally to www.medium.com including specific blogs. Plus all pages internally.

Projects

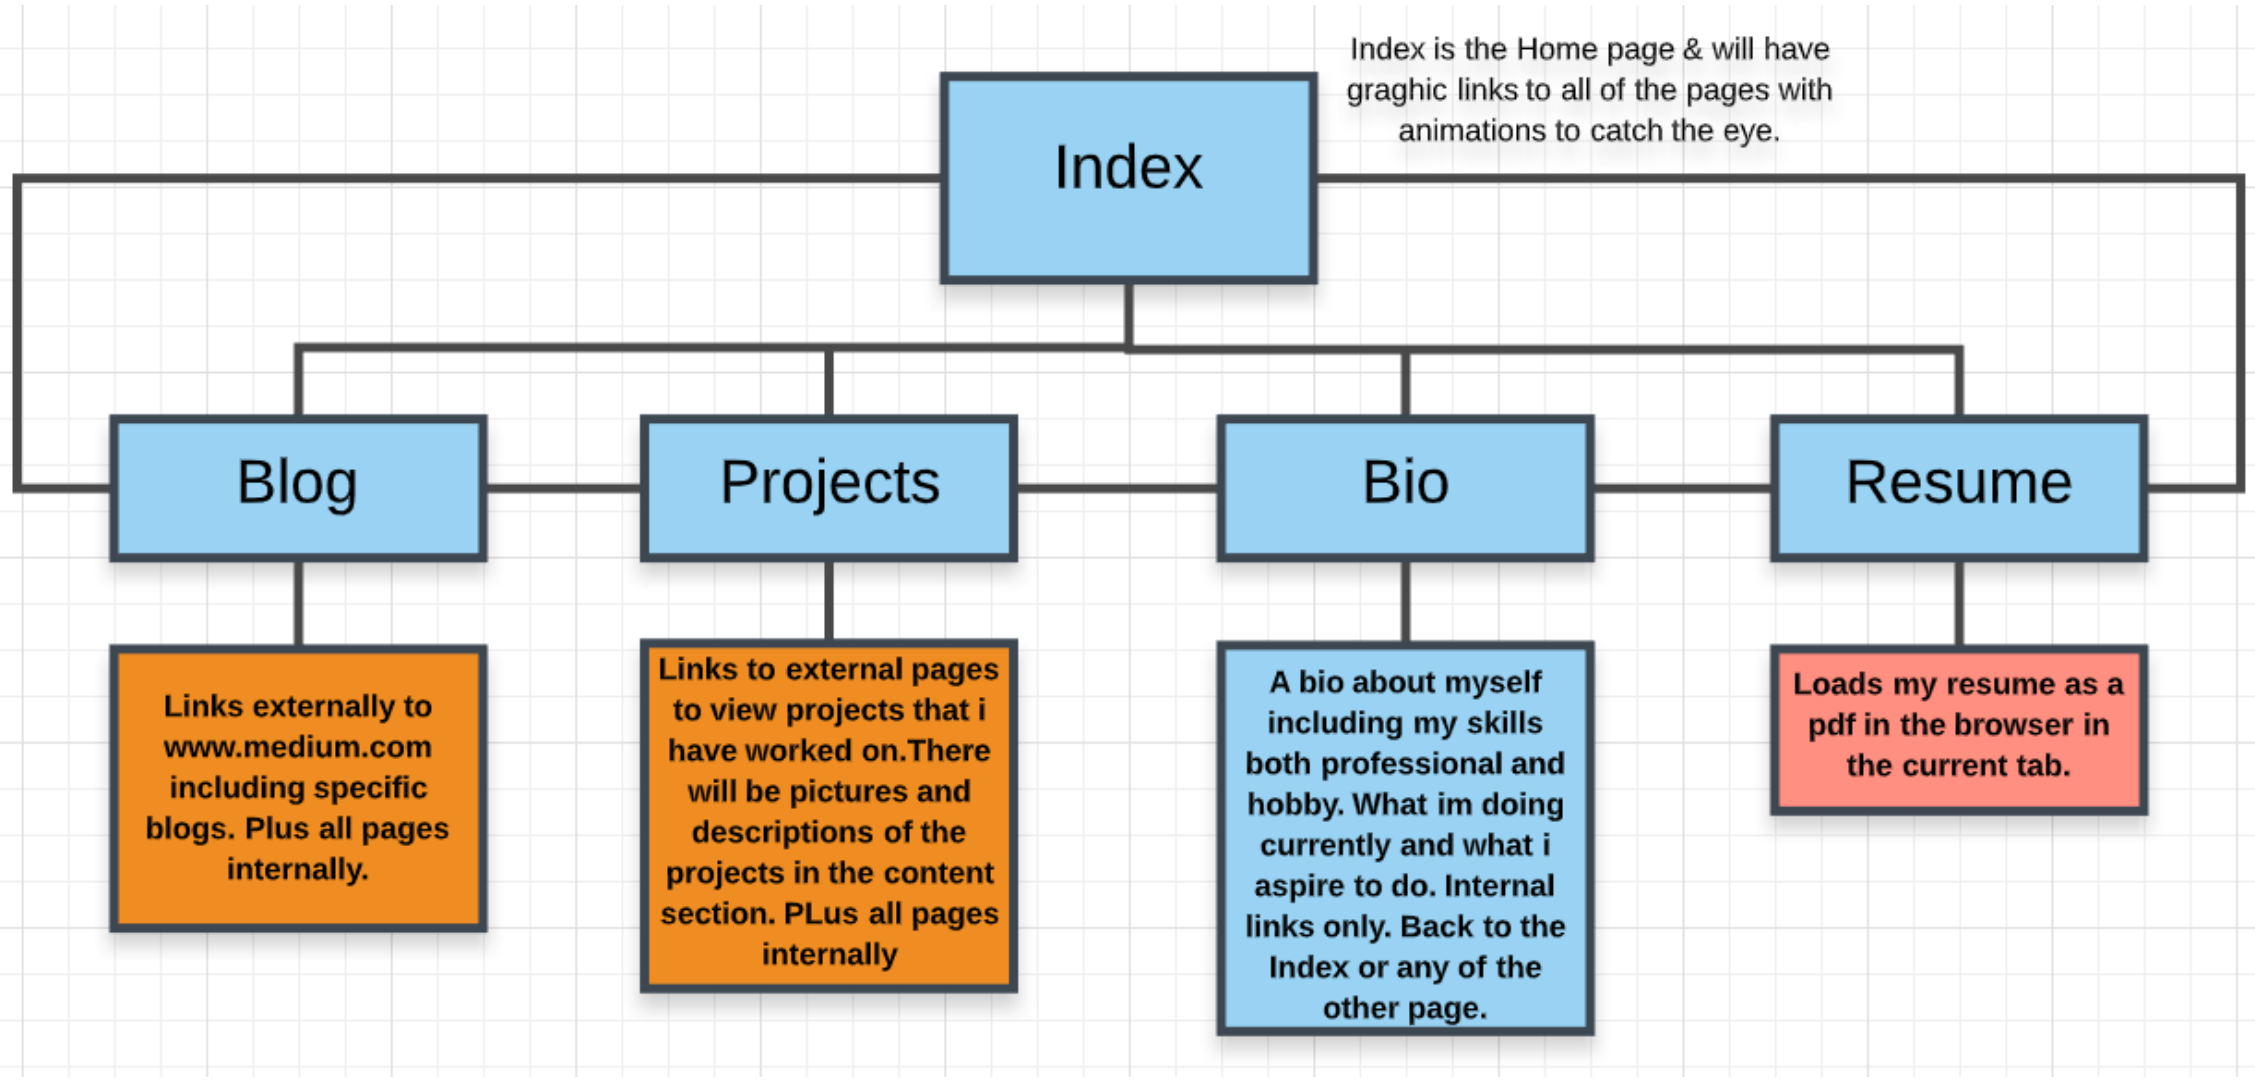

Links to external pages to view projects that i have worked on. There will be pictures and descriptions of the projects in the content section. Plus all pages internally

Bio

A bio about myself including my skills both professional and hobby. What im doing currently and what i aspire to do. Internal links only. Back to the Index or any of the other page.

Resume

Loads my resume as a pdf in the browser in the current tab.

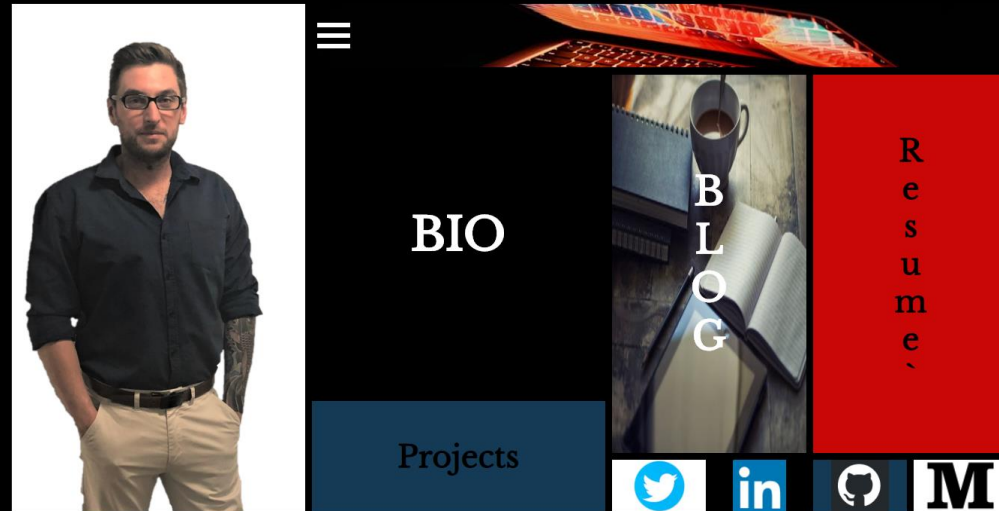

when you write 10
lines of code without
searching on Google

Components

</Rory B.>

- INDEX
- Interactive Index page – Clearly Understandable headings to go to the main page sections
- Grid layout design which will flow through the whole site
- Animations of the linked sections - Catch the eye and draws the user in.
- Hover hamburger dropdown menu – An interactive component to display some level of CSS knowledge. Not used for mobile versions due to lack of IOS Responsiveness.

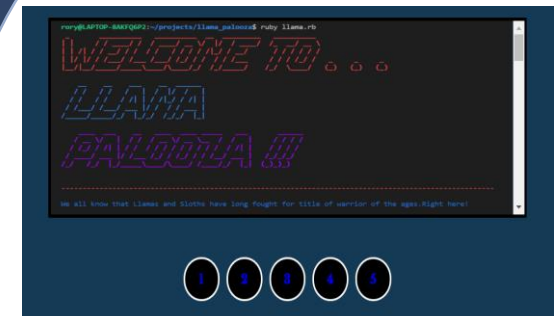

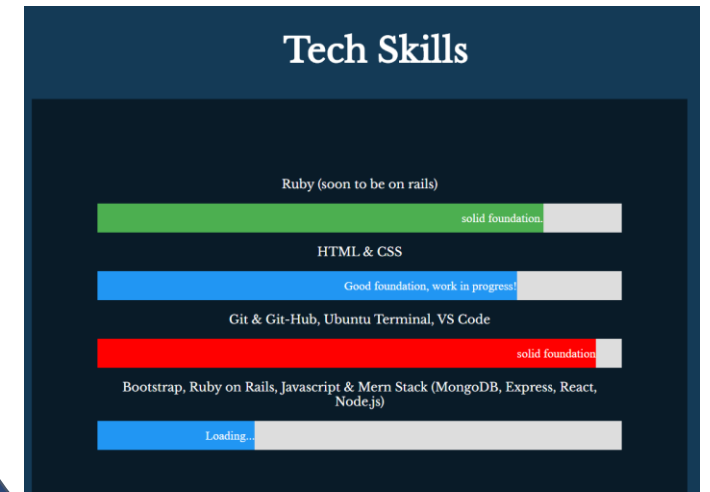

Components

Bio, projects & blog

- A skills bar. A nice graphic way to display my skills to break up a text heavy page.
- Fixed side hamburger nav – interactive drop down menu for easy navigation no matter where on the page you are.
- Blog directory for easy navigation around a long page.
- Slider with button nav for user experience

Assignment deadlines coming at me like

CHALLENGES

*Not enough
restriction Made it
easy to stray*

Planning time
frames with lack
of experience

Creating great
responsive layout
without
experience

I LEARNT

Lots of small lessons that
add one to one massive
learning curve.

The importance of the
planning phase.
(which will get easier with
more coding experience)

Learning the importance of
community in the tech
world.
(contribute to it and it will
be there when you need It)

THANKS!!!!
